Federal Communications Commission Office of Engineering and Technology 7435 Oakland Mills Road Columbia. MD 21046

## To Whom It May Concern:

This letter is to request Limited Modular Approval in accordance with FCC Rule Part 15.212(b) for the certification request under FCC ID: 2AJNQ100. This product is 2.4 GHz radio module and can be used either standalone or installed on a host PCB.

Declaration of conditions.

Y/N	15.212(a)(1) Condition		
N	(i) The radio elements of the module have their own shielding. The physical		
	crystal and tuning capacitors may be located external to the shielded radio		
	elements		
Y	(ii) The module has buffered modulation/data inputs (if such inputs a		
	provided) to ensure that the module will comply with part 15 requirements		
	under conditions of excessive data rates or over-modulation.		
Y	(iii) The module has its own power supply regulation.		
Y	(iv) The module complies with the antenna and transmission system		
	requirements of §§15.203, 15.204(b) and 15.204(c). The antenna(s) are either		
	permanently attached or employ a "unique" antenna coupler (at all connections		
	between the module and the antenna, including the cable).		
Y	(v) The module was tested in a stand-alone configuration, i.e., the module was not inside another device during testing for compliance with part 15		
	requirements. Unless the transmitter module will be battery powered, it		
	complies with the AC line conducted requirements found in §15.207. AC or DC		
	power lines and data input/output lines connected to the module do not contain		
	ferrites, unless they will be marketed with the module (see §15.27(a)). The		
	length of these lines was the length typical of actual use or, if that length is		
	unknown, at least 10 centimeters was used to insure that there is no coupling		
	between the case of the module and supporting equipment. Any accessories,		
	peripherals, or support equipment connected to the module during testing were		
	unmodified and commercially available (see §15.31(i)).		
Υ	(vi) The module is equipped with either a permanently affixed label or is		
	capable of electronically displaying its FCC identification number.		

Υ	(vii) The module complies with any specific rules or operating requirements that
	ordinarily apply to a complete transmitter and the applicant has provided
	adequate instructions along with the module to explain any such requirements.
Υ	(viii) The module complies with any applicable RF exposure requirements in its
	final configuration. The instructions provided with the module adequately
	explain any usage conditions or restrictions.

Explanation of limitations for items not compliant with the above conditions.

Section	Detailed Explanations (if needed)		
i	Lack of shielding		

List of additional restrictions or conditions of use for this module (optional).

Grant holder is responsible for compliance of the module in its final configuration

Methods used to address restrictions to ensure compliance for all finished products (optional).

The module is not to be sold to OEMs and to be installed in hosts as configured by the grantee and all installation instruction and warning is contained in the user's manual as provided to the installers.

I acknowledge on behalf of the applicant that compliance of this module in all final configurations is the responsibility of the applicant under the condition that the integrator follows all provided installation instructions.

Sincerely,

Michael Crocker
